HARRAN UNIVERSITY

DEAR STUDENTS AND COLLEAGUES

It is pleasure to welcome you at Harran University. This may be your first visit to Turkey and especially to Sanliurfa - Zero point in time - Upper Mesopotamia and we are sure you have many questions. One of the objectives of this guide is to answer some of them in order to ease your integration into the academic life here.

Harran University has been the oldest Islam University named Harran School in the World. It re-opened its activities in Sanliurfa in 1992, and we continue the tradition of hosting foreign students. The university is the most important institution of higher education in the South East of Turkey called upper Mesopotamia. Now Harran University functions with fourteen faculties and two colleges offering 4+ years of undergraduate degree programmes, graduate programmes and thirteen vacational schools which provide two-year associate degree programmes. The students in three institutes enroll to get degrees toward master's or Ph.D levels. Over 1000 faculty members serve in about 80 different departments / programmes to a population of more than 25.000 students. At Harran University the language of education is Turkish. But some courses are given in English to Erasmus students in some departments.

This guide you will find useful information not only about Harran University but also information about living in Sanliurfa, some opportunities for discovering the beauties, cultures of the Southeast Region of Turkey, and tasting excellent Turkish Cuisine.

"We wish you a pleasent and fruitful study in Sanliurfa and we hope your study at our university and your stay in our beautiful region in the Southeast of Turkey will meet your expectations."

Turkey covers territory of more than 780.500 square

kilometres and is situated both in Asia and Europe and is boarded by Russia, Armenia, Iran, Irak, Syria, Greece and Bulgaria. It is formed 7 regions and 81 provinces. Ankara is capital city; Istanbul is the most crowded; Antalya, Mugla ,Bodrum, Kuşadası are the most touristical cities, Sanliurfa, Diyarbakır, Mardin are the oldest and the most historical cities.

Göbeklitepe - known The oldest Temple in the World and ZERO POINT IN TIME; Harran-known the first Islamic University (Harran School) was founded there, and Prophet Abraham's Cave is located in Sanliurfa.

"SANLIURFA - ZERO POINT IN TIME", "UPPER MESOPOTAMIA"

SANLIURFA AT PRESENT

Sanliurfa is located in the Southeast Region of Turkey about 840 km distant from the capital Ankara and 1280 km distant from Istanbul. It has about 2,5 million inhabitants included 500.000 Syrian immigrants. There are not any security problems and according to criminality statistics it is one of the safest cities in Turkey. The city Sanliurfa includes many different cultures. The inhabitants are formed from Arabics, Kurdish and Turkish people but They live on the peace alltogether. And also it is a quite cheap city to live.

Turkish Cuisine is the most famous and richest in the World. You can reach the most delicious and many kinds of Turkish Kebabs, Turkish Pizas, Döner Kebabs and Baklava in Turkey, especially in Southeast Region of Turkey.

You can reach the city Sanliurfa by plane connecting Istanbul or Ankara.

Q CLIMATE AND AGRICULTURE IN ŞANLIURFA

Sanliurfa is one of the warmest cities in Turkey with an average daily high temperature of 25 degrees centigrade. Several months of the year it is warm to hot at temperatures continuously above 25 degrees centigrade, sometimes up to 40 degrees centigrade because it is close to Ecuator. Due to the low humidity it feels much cooler. So the warmer temperatures the best time for traveling is Spring or Fall.

Sanliurfa has a wide plain, so it is an agricultural city. Pistachio, cotton, wheat, barley, lentils, fruits and vegetables are grown abundantly by watering from Atatürk Dam.

As you know, Baklava is the most famous sweet in Turkey. Pistachio is the most important item for the best quality of baklava.

250.000 tons of pistachio are grown annually in Turkey, 100.000 tons of them are grown in Sanliurfa.

The professors of Agriculture Faculty advise the farmers of the region in the process of growing these plants.

A HISTORY OF SANLIURFA

"The city of the Prophet Abraham, Şanlıurfa"

Sanliurfa, also known as Urfa, is an ancient city in the Southeastern Anatolia called Edessa then. With its excellent old buildings and its connections with Christianity and Islamic tradition, Sanliurfa offers a great trip full of history, religion and architecture. Looking like a Middle East town, while there, you can visit mosques and churches, ancient ruins, wander around historical bazaars, enjoy the delicious cuisine. This city's name is also in a lot of Biblical stories. Many believe that Urfa was the place where God tested Job. At the same time, it is also the place where Prophet Abraham was born, raised and also died.

Prophet Abraham's Cave

Balıklı Göl or in English "Lake with fish" or Balıklı Lake is a holy pool which was believed by Muslims to be the place where Abraham was thrown into the fire by Nimrod. You are

probably thinking "why though"; well, gather around my children because it is story time!

Legends say that Abraham, (Ibrahim in Turkish) who was born and raised in here, was also the great enemy of the King Nimrod, since he was the one to declare war on idolatry during his time. But like any other legend, most importantly Abraham won the heart of the King Nimrod's daughter, Zeliha. King Nimrod sentenced Abraham to death instantly, like every other furious king would do and commanded to build a massive pyre to burn him alive. Rumor has it that when he was tossed in the fire, the flames became water and the burning logs turned into fish. Still today, this pool is considered sacred and the fish inside it holy; it is also said that anyone who eats them will be struck blind!

We all know that Abraham is an important figure in the Christianity and Judaism, as well as in Islam. But why is he so important? With his noble personal attributes and by being fully committed to God, Abraham is most frequently mentioned in Islam's holy book of Quran. He had everything he could ask for except from a son. So God asked him to leave his country and travel with his family to a land that God would show him. In return, God promised him many descendants. He trusted God and his family was soon blessed with a son, Isaac. Sounds like a nice story right? But wait, there is even more! God had another test for him later on and he asked Abraham to sacrifice his son. Abraham was very sad but willing to obey; right before sacrificing Isaac, God stopped him by sending a sacrificial animal from above. That day is still celebrated as a festival by Muslims, and it is known as Eid al-Adha aka feast of sacrifice.

The pool is also in the courtyard of the mosque of Halil-ur-Rahman, which was built in 1211. It is said that if you see a white fish, the door to heaven will open for you.

The Ancient City Of Harran

This cocoon-shaped houses were the ruins of the major ancient city that hosted many ancient civilizations. The ancient city of Harran is one of the most attractive tourist attractions in Urfa. Archeological proofs state that this ancient city was a major commercial, cultural, and religious center in 3rd millennium BCE period! We first heard of the ancient city of Harran from Ebla tablets, which are dated in the late 3rd millennium BCE. These tablets threw light upon the facts and stated that an early king or the mayor of Harran married a princess named "Zugalum", who then became the queen of Harran! As mentioned before, Harran hosted many civilizations. Most important eras that were shaped here are the Assyrian period, the Hittite period, the Babylonian period, the Persian period, the Roman and of course the Islamic period.

Harran is famous for its cocoon-shaped houses that were originally made to keep the inside of these houses coldwhich makes sense since summers are hot in this region! These houses are still standing strong for over 3.000 years. This place is very important to Muslims, since Harran has the oldest mosque built in Anatolia and it's an important showcase of the Islamic architecture. The Grand Mosque of Harran was built in between the years 744-750 and remains still up until today!

Göbeklitepe & Şanlıurfa Archeology And Mosaic Museum

Göbeklitepe is more than just a massive carved stone which was crafted by prehistoric people, whom had not yet developed metal tools or pottery! It is known that Göbeklitepe is 7.000 years older than Stonehedge, and 7.500 years older than the Pyramids of Egypt! This breathtaking archeological site has distinctive T-shaped pillars carved with images of wild animals, showing us what life was like about 11.500 years ago. It is located at the northern edge of the Fertile Crescent, which was the perfect place of settlement for the prehistoric people. Do not miss out on visiting this incredible site along with the archaeological museum situated right next to it!

DISCOVER SANLIURFA, HOME OF KELAYNAK BIRDS

Turkish Northern Bald Ibis is known as Kelaynak in Turkey and this spicies is almost being extinct in the World. The colony of the Northern Bald Ibis lives only in Birecik district of Sanliurfa province on the Euprates in Southeasthern part of Turkey.

Northern Bald Ibis (Kelaynak) is a large black bird with its featherless head and neck and a long curved red beak, living in semi deserted or rocky habitats. The rest of their body is covered with dark purple feathers.

Northern Bald Ibis lives in colonies nesting and mating on the steep rock cliffs to protect themselves and their eggs from wild animals and humans. It lays between 2 and 4 eggs and eat mainly insects, beetles, lizards, snails, worms, ants, small snakes and scorpions by probing with their long beak into cracks in the soil.

Birecik and its surroundings are the habitat of critically endangered Northern Bald Ibis. This bird reaches maturity around five years old. Its average lifespan is about 25-30 years.

In the past The Bald Ibis bred in a wide region from Turkey to North Africa, the Arabian Peninsula to Morocco.

The Ibises, which were migratory birds, spent their breeding periods in February-July in Birecik (6 months), and the Winter Period in August-January in Eritrea, Ethiopia, Yemen and Saudi Arabia (6 months)

But these years, the birds are no longer allowed to emigrate because they face the danger of extiction.

Today, Bald Ibis is one of the bird species facing extinction. They live only in the Nile Valley and Birecik, Sanliurfa in the World. But all of them can not migrate to Nile Valley.

Kelaynak

The Nests of The Bald Ibis (Kelaynak).

Northern Bald Ibises living in the Bald Ibis Reproduction Station in the southeastern province of Sanliurfa have been released to nature to allow them to reproduce.

The Bald Ibis Reproduction Center was established in 1977 in the city's Birecik district, and aims to allow these critically endangered species of bird to survive and reproduce.

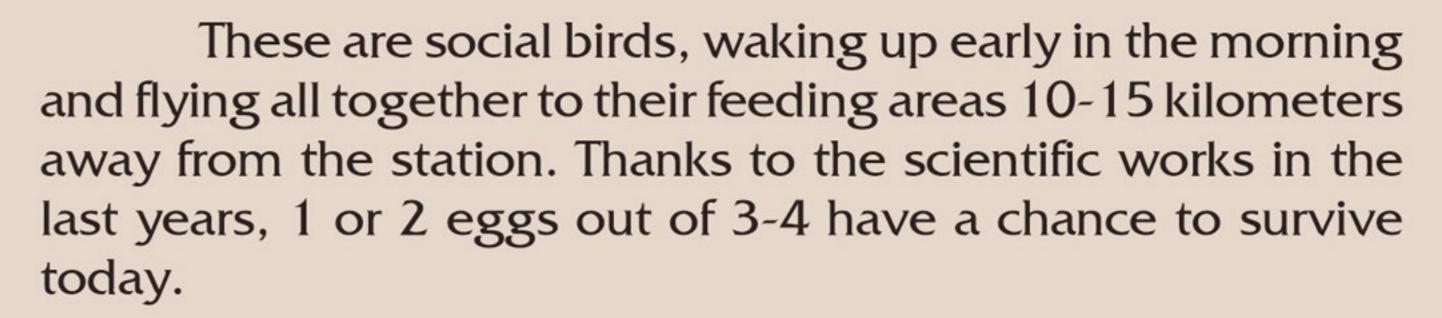

The center feeds them a special diet including fat-free ground meat, boiled eggs, grated carrots, chicken feed and unsalted cheese.

The birds are followed daily by teams from the General Directorate of Nature Conversation and National Parks. With transmitters attached to their feet, they are set to be sent on their migration routes, but only once the war in Syria and other conflicts in the Middle East finally come to an end.

During the reproduction period of February and March, the ibises are set free to reproduce but are re-caged later on.

Limited information on the migration journey of rapidly growing bald ibis has been increasing, thanks to the fact that individuals sent to migration have been watched by radio transmitters.

A group of Bald Ibis sent to immigration, starting from Turkey, Syria, Saudi Arabia and the ongoing migration of Yemen, was able to finish near Ethiopia. After about 3 thousand kilometers of immigration, they returned to Birecik, Sanliurfa.

The most important feature of these birds is that they are "monogamous" and are very loyal to their spouses. It has been seen that some Bald Ibises whose spouses have died, have chosen to commit suicide by abandoning eating, or leaving themselves down the rocks.

Birecik Ibis Sanctuary. Birecik, Turkey

HARRAN UNIVERSITY ERASMUS MOBILITY GUIDE FOR STUDENTS / STAFF

Q CONTACT / COOPERATION

- # HRU Web: http://www.harran.edu.tr
- # Erasmus+ Web: http://erasmus.harran.edu.tr
- # Erasmus+ e-Mail: erasmus@harran.edu.tr

ERASMUS+ AT HARRAN UNIVERSITY

Harran University participated in the Erasmus Programme in 2004. Citizen students can go to study at Europian Universities, and Foreign students can come to study at Harran University on the frame of the Erasmus+ programme with the assistance from the Erasmus Office and co-ordinators from faculties.

Erasmus Traineeship at Harran University;

We will be happy to accept your students for trainee on the framework of Erasmus mobility.

- # In Hospital,
- # In labratories on Biology, Phiysics, Cehemistry,
- # In Renewable Energy and Energy Efficiency Center,
- # In Erasmus Office,
- * On Plant Science Fields,
- * And differents opportunities according to agreements.

GENERAL INFORMATION

Call for new exchange students

- * Autumn Semester: 16 September 15th January
- *Spring Semester: 3rd February 16th June
- * Application / Nomination deadlines:
- ** Autumn Semester: 31st August
- *Spring Semester: 31st December

A How to apply?

- * Nomination from Home University
- Sending required documents

DOCUMENTS

- ***** Application Form
- Learning Agreement
- Copy of passport
- Transcript of Records
 - ▶ Copy of Healt Insurance valid in Turkey
 - Copy of Civil Liability Insurance valid in Turkey
- * Documents can be sent by e-mail

A LANGUAGE

- ***** Expected level of English is B1
- ***** Studies offer in English

FACULTY OF ENGINEERING

Department Of Civil Engineering

- ** Tunnel Design and construction (3 ECTS)
- ** Soil Mechanics I (6 ECTS)

STAFF WEEK AT HARRAN UNIVERSITY

Erasmus Office performs staff week to intensify international collaboration with our partners in the fields of teaching, studies, sharing the best practises and international collaboration in general with partner universities. At the end of these organizations our collaborations increases on student and personnel exchanges.

TRANSPORTATION TO ŞANLIURFA

BYPLANE

We recommend Sanliurfa GAP Airport in Sanliurfa from Istanbul or Ankara. And then take the bus-HAVAŞ to the city center. Sanliurfa GAP airport is located 40 km from Sanliurfa city center.

PUBLIC TRANSPORT IN SANLIURFA

The public transport system in Sanliurfa consists of a bus network. You can buy a public transportation card from bus transportation center. The main campus of Harran University-Osmanbey Campus-is located 20 km outside of the city center. Buses are operated between the campus and the city center on a 24/7 basis with 10 minutes intervals during working hours.

Mention amenities of the campus: hospital, süpermarket, cafes, sport facilities, etc.

***** COST OF LIVING:

Erasmus+

Cost of living is relatively low compared to the other European countries. (300 EURO is average monthly living cost for students). We suggest that students bring approximitaly about 300 EURO per month to cover all their basic living costs. The final cost of living depends on student's personel lifestyle.

***** EXAMPLES OF LIVING EXPENSES

- ACCOMMODATION AT GUEST HOUSE: 120 EURO/month
- FOOD AT A RESTAURANT: 5 EURO

LUNCH AT UNIVERSITY CAFETERIA FOR STUDENTS: 1 EURO

- FAST FOOD MENU: 3 EURO
- CINEMA TICKET: 3 EURO
- DRINKS: 1 EURO
- TAXI: 5 -10 EURO
- TOTAL: 300 EURO

***** THE MOST IMPORTANT EMERGENCY PHONE NUMBERS IN TURKEY

- A HRU University Security Unit: +90.533.156 97 26
- Police (Security & Traffic): 155
- ♠ Fire: 110
- Medical Emergency: 112
